A Bi-Weekly Milk Check To Beef Ranchers Is Plan Of Foremost Dairies In The 200-Head Model Dairy At Hillsboro Plantation

Large-Framed Dairy Cows Crossed With Best Type Milk Check And Heavy Calves

Foremost Dairies, an international operator in dairy products with an approaching 200 million dollar annual business, has acquired some 1700 acres of land, and a building for dairy-houses, and have completed tentative plans to build corrals, plant grasses and install machinery for a 200-head model dairy at the earliest practicable time according to information released on Thursday at Belle Glade.

Chairman of the Board, Paul E. Reinhold, accompanied by two brothers and Vern D. Tuttle, Miami Area Manager, inspected the site Wednesday and made plans for location of pastures and other facilities.

"We have demonstrated on Penny Farms, and in other areas," said President Reinhold, "that cattlemen interested in breeding may very profitably establish a herd of milkers with best type bulls and receive a milk check every two weeks while growing out the calves to saleable age. The calves we have produced by this system have proven very acceptable as beef animals, and we will demonstrate this in the model operation we will establish at Hillsboro Plantation."

"To make this plan work there must be a sale for the calves," said Mr. Tuttle, "and that's where we come in: we will take this milk, and we will continue year-round, for we use a large volume of milk in what is known as 'manufactured milk.' At the present time this manufacture of milk is produced in other areas, and this is a \$25,000,000 in value of manufactured milk products."

"We are not interested as milk producers; we are interested as milk distributors and milk manufacturers. We are establishing this dairy only as a demonstration—to show calves providing the costs involved in producing, barns, equipment, etc."

An important point brought out in the discussion is that the high protein grasses normally produced in the Glades will allow a minimum of manufactured feeds and allow a longer productive life to the milk cow. Because the cost of feed is a large factor in dairy production, a dairy herd highly concentrated feeds to get as much milk as possible, many good milkers are "burned out" in half the time it is possible to use one.

Because of the set-up received by the company at Hillsboro, the expansion of the receiving station is very easily accomplished, the new organization is ready and willing to take on as much milk as the farmers of the area will produce. Because of its manufacturing facilities, Foremost will take the milk year-round, and is not dependent on the varying demands of Florida's tourists.

H. M. McIntosh, President of the Bank of Pahokee, in discussing this new venture, said: "To have such an organization come into the Glades with a plan of (Continued on Page Four)

PAR-TEE LINE

Country Club of the Glades By Kathleen Livingston

The golfers in the inter-city league were unable to play Sunday in West Palm Beach on account of rain, so August 30th is the date set for play.

The Elks Tournament which includes much eastern Florida cities will be held in Vero Beach Sunday, August 23 in the afternoon at West Palm Beach, as the date has been changed.

The golfers will play in the Gulf Stream Tournament Friday, August 22, at the Hollywood Country Club, as girls we could get together and make a good showing.

Still showing on Ladies Day which is bad on our golf game.

At Right is Vern P. Tuttle, Miami Area, with Paul E. Reinhold, President, Arthur W. Reinhold, Vice President, and other Foremost Dairy executives. They are standing in front of the Hillsboro Plantation dairy facility.

Postmaster Farnall Tells Lions Of The New City Delivery

Postmaster George Farnall, as guest speaker at the Lions regular meeting gave a running account of his activities, and the duties of the post office.

Mr. Farnall came to the Glades as a representative of the American Legion in 1928 and liked the place. He was appointed postmaster in March of 1930, when the office was fourth class.

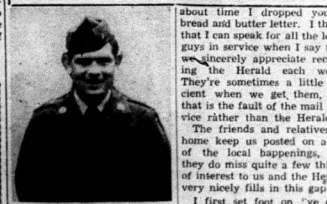

This is now a first class office and is sixth largest in the County.

"The second extension of city delivery limits," Mr. Farnall said, "as requested by the Post Office Department under date of July 15, has been granted. The new sections to be added to the present delivery limits include Ocala Camp, the packing house district, the Lloyd Subdivision, the 500 and 600 blocks of second through seventh Streets, Southeast, and the 500 block of fourth through tenth Streets, Southwest."

The area as covered will include about 500 families, 40 stores, thirty other places of business and twenty apartment houses, serving an estimated 2300 people.

If the necessary equipment

NEWS OF GLADES BOYS AND GIRLS IN THE SERVICE

RAY M. HARDY Ray M. Hardy, with the Medical Detachment in England, recently sent the following interesting letter to the Herald. You too may enjoy his newsy chat on customs of our English cousins. ("Blokes" he calls them, as compared to ours.)

MEDICAL DETACHMENT 44 AAA AW Bn (SM) APO 194, c/o P.M.

New York, New York. Editor Belle Glade Herald: Dear Sir,

Since I've been enjoying the Herald I've been over two years now I decided that I was

Glades Guard Unit Gets High Rating On Field Training

Company E* Kitchen Rated Best In Division, In A Camp Rated Superior

Company E, consisting of 63 enlisted men and 2 officers returned home from Ft. McNeil, Alabama, Sunday, August 9th, from two weeks of intensive field training.

Small unit tactics were stressed in the training as well as the qualification of weapons crews. Thirty new recruits attended recruit school for the first week at camp. All men from Company E passed the examination given after the first week of the recruit training. Daung Howell of Clewiston was high man of the class with a score of 83. Cpl. Joe G. Lewis of Belle Glade was commended for the manner in which he conducted his classes given to the recruits in their first week of training.

The men received drew praise from every corner for the performance they gave at camp. E Company kitchen was rated by those of the inspecting officers as the best in the Division. The food at camp this year was superior to any other year according to the opinion of all the old timers. SFC James C. Sims supervised the mess section which was assisted by Sgt. Anthony Toulis, Sgt. Ralph Tillman, and Cpl. John R. Varnum from Clewiston and Pfc. Richard Tillis from Pahokee.

275-Up Local Boys Will See Little World Series Game

A group representing the Legion, Lions, Elks and Rotary met in the office of G. R. Townsend on the evening of August 18 to plan for carrying the Little League and Pony League boys to Miami for the Little World Series game, Thursday, September 2. Those present were Tommy Parker, A. J. Parks, Joe Coker, Bill McClintock, P. S. Hobson, Kirkman, and Dick Townsend.

Plans were made for conveying approximately 275 boys from Belle Glade, Pahokee, and South Bay in cars of service club members. In view of the large number of cars involved and the safety of so many boys, it was decided to ask the Hi-Way Patrol to provide an escort patrolman for the group.

The group had already agreed to escort the cars as far as South Bay and to pick them up again at Hialeah, has been the committee in view of the number of vehicles involved.

Plans were made for further contact with the Patrol after the number of cars from the three towns has been determined. They were instructed to seek the cooperation of the Highway Patrol for the entire trip and of the Belle Glade and Miami police within their respective city limits.

The following recommendations were made by the committee:

1. The boys should assemble at the Legion Hall in Belle Glade at 8:00 pm on Thursday, September 3. They will leave from this point in cars provided for the local service clubs, as soon as they can load and the Pahokee delegation has arrived.

2. George Rhudy will furnish his P.A. system to help in marshalling the group.

3. The Highway Patrolman will issue instructions to all drivers at the point of assembly. All cars are to keep in line and allow about 300 feet between each car. They are to proceed at about 45-50 miles per hour with light on. Any car having difficulty will be asked to drop out of line and the other proceed. Drivers should be sure of their tires, gas and mechanical condition of their car before starting.

4. The boys should eat well before starting and should carry a sandwich. They will be able to get food and drinks in the stands but there will be no (Continued on Page 4)

Local Reservists Practice War As Key Officers Of The 318th Logistical Command, Camp Rucker

Major Ed Lively and Lieutenant Robert Roberts are discussing a problem with the 318th Logistical Command, Camp Rucker, during a training exercise.

Registration Of First Grade Aug. 28

All children entering the first grade this term will register Friday morning, August 28, from 9 am until 12 am. Those entering Belle Glade Elementary School will register in the Elementary School auditorium.

Children living in the Ocala Camp will register at the same time in the Ocala Camp school, according to Mrs. Dorothy McDonald, principal.

Children registering must be six years old on or before December 1, 1953.

A birth certificate must be presented at the time of registration.

The school urges parents of these beginning children to register them at this time, in order that first grade teachers may have time to become acquainted with the pupils and parents before the opening day of school.

Mrs. Margaret Mosley is principal of the elementary school.

WILLIAMS CHILD SEVERELY CUT

Kay Williams, seven year old daughter of Mr. and Mrs. Bruce Williams of S.E. 3rd St. was badly cut on the face Saturday afternoon when she was running through the yard, turned around without looking and bumped head on into parked car headlight, which broke and cut her forehead, from under eye down nose and lip to chin. She was rushed to Belle Glade Memorial Hospital where Dr. Herman Baxt examined and

Flood Control Meeting Will Emphasize Present Glades Emergency Danger

RAMS START EARLY MORNING PRACTICE

The Golden Rams will start practice daily at 8:30 am and 9:30 pm, practice session 1 1/2 hours, according to Calvin Peacock, High School Football coach.

Games scheduled for the season with the exception of October 23, are as follows: September 17, Miami Tech, here; Sept. 25, Vero Beach, here; October 2, Clewiston, there; October 9, Ft. Pierce, there; October 16, Stuart, here; October 23, open; October 30, Pompano, here; November 13, Seacrest, there; November 20, Okeechobee, there; November 25, Pahokee, here.

The first meeting of the athletic council will be held at the high school, Wednesday, 8 pm, August 26. Members of the council are Jerry McKee, R. E. Hotard, Clarence Kidder, L. P. Parson, Pat Burke, Melvin Morris, J. H. Harrell, Louis Kirkman, W. C. Young, Pelton Morris, Charles Godwin, Hector Ouletto and Roy Layfield.

Dr. Proctor assisted by Gaylord Lewis and Dr. Harris gave two blood transfusions and performed the two hour operation which required 100 stitches.

Kay was released from Hospital Wednesday and according to her father the doctors did a wonderful job.

Plans And Program Discussed At Pre-School Meet In WPB

The 1953 pre-school conference for the faculties of the Palm Beach County Schools was held Monday, August 17. Faculty members reported to their respective schools for initial orientation and planning for the year.

At the Palm Beach County School Auditorium, the principals met with the staffs of Belle Glade Elementary and High School. The first day's planning included the selection of committee chairmen for the year.

The opening county-wide meeting for all teachers and principals was held Tuesday at 9:30 am in the Palm Beach High School Auditorium. Following this several group and committee meetings were held to make initial plans for the school year.

At 1:30 pm all the teachers met again in the auditorium and heard an interesting panel discussion by Palm Beach County teachers who have recently returned from foreign countries where they were teaching, studying and sightseeing.

John Leonard, principal of the group of eight teachers who gave most informative reports on the people and conditions of the countries to which they were assigned or taught. Countries visited included Denmark, Sweden, Norway, England, France, Scotland, Germany, Spain, Cuba, Holland and Thailand.

Group meetings were held throughout the week for teachers of the same grade levels, who studied plans and problems of like nature. Teachers of various subjects also met to plan for a better program for the children of Palm Beach County.

An important part of the pre-school program included meeting and field trips based on the theme "Know the Community of Your Country." The idea behind this theme is that teachers will be better able to train children.

City Hall Doings For Month of July

Building Inspector made 1715 inspection of contracts, collected \$352.80 cash for permits, built 10 new buildings and etc. and reports 38 construction jobs in progress at this time at an expenditure of \$500.00 or more.

Fire Department only had one general alarm turned in with the result of no fire on arrival of firemen, one muck fire and two drills. The lowest payroll of the year for volunteers \$74.00.

The Library made 617 loans of reading materials, added 51 adult fiction, adult non-fiction and juvenile fiction, with a circulation of 793 adult, juvenile books and periodicals.

Park Department had nearly 350 children of school age in care for worth-while citizens (Continued on Page 2)

Everyone Invited To Present And Best Type Bring Milk Affects Him or Glades

The Palm Beach County Resources Development Board Flood and Water Control Committee has called a meeting of landowners, farmers and those interested at the City Hall, Belle Glade at 2:30 pm Tuesday, August 25th with the invitation to one and all to come and be assured of an opportunity to air views, for or against any item in the overall plan as it affects the area, or to bring up any item thought to be of value.

A meeting was held in Belle Glade on last Friday night and one in Cape Point on Monday night for the purpose of discussing the plan and the importance of the flood control project and the emergency of the Glades on account of the threat of rains and storms require emergency action.

The building of L-2 which runs southward from L-1 will prevent the water from high-lower the water level in the area and will be a great help to the area.

The installation of pumps at the area perimeters will afford immediate relief to the agricultural area, and should be a must in the immediate future as an emergency measure, according to representations made at the meeting in Belle Glade.

A trip to Alaska and Senator Smithers had a previous speaking engagement; word has not been received from Congressman Rogers. All three were invited to attend this meeting.

The Senate and Senate Board have been invited to attend, and the presence of some of the members as well as the engineering department is assured. Col. Schull has indicated that he will be present with several of his organization.

The board has been invited with the request that they be ready to answer questions. Some of the members of the State Chamber's Committee on Flood and Water Control will be present at the invitation of Chairman Luther Jones.

The board has been invited to the Budget Commission and Congress is hoped to be formed at this meeting, and all interested are urged to attend.

Thursday's Sale Of 219 Bring 88% For Slaughterers Use

The second Thursday sale at the local Livestock Market brought 219 head, mostly utility steers, with 88% of the whole going to slaughterers. Approximately 24 heifers went for stockers, but the price averaged 10 to 11c because of the market condition of meat. In Miami, utility beef brought around 20c on Thursday.

There will be a sale, as usual next Thursday.

Last Thursday's sale seemed to have no effect on the Monday sale for there were 890 head of cattle handled with 70% going to slaughter. The Thursday sale was \$500.00 or more.

BREGGERS IN ACCIDENT ON WAY TO WASHINGTON

Word has been received here that Dr. and Mrs. Thomas Bregger were injured as a result of a two car collision and have been taken to the 5100 St. Louis Hospital in Evanston, Wyoming, where they will remain for at least ten days.

The Breggers are on their way to visit a daughter, Mrs. Elizabeth Preble in Aberdeen, Washington, when the accident occurred.

BREEDERS HEAR DAIRY LEADERS AT FIELD DAY

Palm Beach Breeding Association was well represented at the First Annual Field Day of the American Breeders Service Stud at Asheville, on Tuesday, August 18, when dairy men attended as guests of the organization.

Dr. Vic A. Rice, the principal speaker of the day, spoke of "What Next in Dairy Cattle Breeding?" Professor Rice, one of the country's recognized authorities on breeding of farm animals, gave a most interesting and entertaining talk on what, to the average farmer, could have been a highly technical subject. However, Rice handled it with simplicity, down-to-earth facts, and interesting good humor. He pointed out the great benefits of artificial breeding in reproduction; explained "type" and "style" with simple blackboard illustrations; discussed systems of breeding, showing advantages and disadvantages of inbreeding and outbreeding; and emphasized Sire and Dam selection.

Professor George Hyatt, Jr., in charge of Dairy Extension at North Carolina State University, discussed "Quality Roughage or Else?" Hyatt, well known nationally as a dairy expert, let a message of worth to farmers who depend on home grown feed and pasture for their herd's production. He left no doubt that good quality roughage had to be a "must" or else herd replacements and the production level of the herd would suffer.

Rockefeller Prentice, head of American Breeders Service, welcomed the guests and briefly outlined the present and future of artificial breeding, particularly drawing attention to the necessity of farm service. Along with talks by these dairy leaders, demonstrations on the collection of semen and the artificial insemination of a cow, the huge crowd of dairy men and visitors were escorted on a tour of the stud and the one dairy exhibits, including frozen films and slides on the latest semen process, being studied by American breeders service scientists.

SALESMEN WANTED: Would like to hear from men with capital for Raveling Business in West Palm Beach County. No capital needed. See Mrs. E. H. Haddad, Box 324, Lake Worth, Fla. I'll help you start or write RAVELING'S Dept. FAH-0141, 2108 Memphis Tenn. 6-7-41

Stocker: Heifers - 7,000-11,500. Calves - Inf. 7,000-12,500. Cows - Inf. 6,000-10,750.

A. E. KIRCHMAN NAMED CREDIT BUREAU SCHOOL

Pierre, Vero Beach, Stuart, Jensen, Ft. Myers, Pahokee, Clewiston and Belle Glade, Florida. A. E. Kirchman will leave on August 20 for Bedford, Virginia to attend a regional conference of District Deputies called by Grand Exalted Ruler James to discuss affairs of the Order and activities for the coming year. A. E. Kirchman has served the Order in several positions having held the Order as the first exalted ruler of the Belle Glade Institute Lodge 1947-48. He has served several appointed positions, as well as being Vice President of the Florida State Elks Association representing the South Central District.

PLANS AND PROGRAM (Continued from Page One)

If they are aware of and familiar with the resources of the community and county in which the pupils live. Many places of interest which may give useful information for instructional purposes have been listed by a group of principals and teachers for possible faculty field trips.

A tour of the Glades area has been arranged by Henry O. Eardwood, member of the school board, for August 31. The tour will leave WPA at 8 a.m. and

will include visits to the following places: Glades Cattle Market, Everglades Experiment Station, Pioneer Growers Picking House, Duda Farms and Tabl Ranch.

RHODY WILL RUN FOR COMMISSION

Lester Rhody qualified this week as candidate for city commissioner, from Northboro opposing H. O. Carlton. Other candidates are Herman Close, former Mayor from Westboro and Z. T. Ingram from Centralboro.

Talk around town was that a couple of members of the fair sex thought it would be good idea for the ladies to have a say in the town's politics, but to date only the men are still in the running.

Next Wednesday, August 26 at 4:30 p.m. is the deadline for filing applications in the commissioners race.

Heads Fund Drive

It was also brought out at the meeting that Mr. Luther Jones of The Belle Glade Herald has volunteered to see that each car is bannared with the organization and town represented.

QUESTIONS & ANSWERS ABOUT INSURANCE

Q. WILL AUTOMOBILE insurance pay my medical expenses in case of accident? A. When your policy includes our low-cost Medical Payments coverage, it will pay medical expenses for you, your family or other persons riding in your car, in case of accident. It also covers you or your wife in other cars.

RUSSELL MAGUIRE, New York Insurance Agent, has been named National Chairman of the National Automobile Insurance Council. The council is an organization of insurance companies and is dedicated to the task of rendering the best possible service to both the buyer and the seller.

Calves - Good 17,750; Coml. 12,750-15,000; Uty. 11,250-13,750; Cut. 5,500-10,500. Cows - Uty. 9,500-11,750; Cut. 7,500-9,500; 3,000-7,000. Bulls - Uty. 8,750-11,500; Cut. 6,250-9,250.

Stocker: Heifers - 7,000-11,500. Calves - Inf. 7,000-12,500. Cows - Inf. 6,000-10,750.

LESIE JONES ATTENDS CREDIT BUREAU SCHOOL

Leslie Jones, manager of Credit Bureau of the Everglades, attended a Credit Bureau and Collection Service Institute August 9 thru 15 at the School of Business Administration, University of North Carolina, Chapel Hill, N. C.

The institute established in 1946 is the parent of all schools of this kind held each summer throughout the United States and is sponsored through the cooperation of Associated Credit Bureaus of America and Associated Credit Bureaus of Florida who paid the tuition and \$30.00 travel allowance.

on a tour of the west since early last June, during which she visited her son, Bob Keene and family near San Francisco, a sightseeing tour of California, Salt Lake City, Denver, Colorado and intervening points of interest, a visit among relatives and friends in Washington, Iowa and Chicago, Illinois, a visit with her son, Jack Keene and family in Miami and her son, Leland G. Keene and family in Pahokee.

Mr. and Mrs. Eric D. Hartline and C. B. Higginbotham made a trip to Delray and West Palm Beach last week to give blood for a transfusion for Hartline's brother-in-law, Doyle W. Crocker. Carl Crocker returned with them for a few days visit.

Bill Morrison submitted to a major operation last Wednesday in West Palm Beach and is reported slowly recovering.

Mrs. W. J. Wall and sons left last week to spend a couple of weeks with her husband at Valdosta before school starts.

Mrs. Berthold Pelka, who was accidentally severely burned on arms and face last Thursday during the noon rush hour at the South Bay Restaurant and hospitalized at the Belle Glade Memorial Hospital with 3rd degree burns on her arms and hands, is reported improved and able to be out of the hospital.

Mr. and Mrs. Alfred Vadaz, Karen and Karol, accompanied by Mr. and Mrs. Howard Leach and of Belle Glade enjoyed a weekend outing fishing on a lake near Lake Placid. They occupied an apartment overlooking the lake and report a very enjoyable weekend.

Mr. and Mrs. John L. Evans and son, John Brown Evans of Bean City are visiting relatives in Spokane and Ashburn. They plan to be away about ten days.

Mr. and Mrs. C. A. Thomas, Mr. and Mrs. Nathan Bolton and their families have returned to Lake Harbor from a months vacation at Fort Myers Beach.

Mr. and Mrs. B. Grant of Arcadia visited her mother, Mrs. J. S. Scoggins, and sister, Mrs. Billie Campbell at Lake Harbor Sunday.

Mr. and Mrs. Bill Crow of Miami were Sunday guests of his sister and brother-in-law, Mr. and Mrs. E. M. Willis. They were accompanied home by his mother, Mrs. Laura Crow.

Mr. and Mrs. W. H. Willis and daughter, Pamela of Miami spent last week with their parents, Mr. and Mrs. H. C. Willis. They were enroute home from visiting her mother, Mrs. J. L. Rhodes of Jasper and her brother in Gainesville.

Mr. and Mrs. Bill Nycklyk of Fort Myers were the weekend house guests of her sister and brother-in-law, Mr. and Mrs. O'Neal Walker.

Mr. and Mrs. John H. Hawkins of Miami brought her mother, Mrs. O. H. Martin home from a weeks visit Saturday and remained over the weekend.

Mrs. E. E. Hardy and three children have returned to their home in Lakeand after a weeks visit with her mother, Mrs. L. O. Ratley.

The Fidelis Church of the Baptist Church taught by Mrs. Frank Prevatt will enjoy their monthly business and social evening at the pastorium Friday evening.

The South Bay Restaurant operated by Mr. and Mrs. Berthold Pelka opened for business after a two weeks holiday for repairs and remodeling on last Tuesday. They will remain open seven days a week hereafter according to announcement.

Mrs. Ruth Brown, daughter, Mrs. Dewey Blair, and granddaughter, Della and Grand Blair of West Palm Beach were overnight guests Sunday of Mr. and Mrs. Julius Herring at Hooker's Point where they were enroute to Bortow to visit relatives.

Julius Herring, Mrs. Hattie White, Mrs. Verda Mathewson, Mrs. H. B. Walker, Mrs. Esther Walker, Mrs. Ruth Brown, Mrs. Inez Nycklyk and Mrs. Elizabeth Roberts were among the twenty-one guests of Mr. and Mrs. Sam Lovell in Chosen last week to hear a talk of the Mormons and hear a way of life given by Grant Averill, formerly of Idaho, now official photographer for the Everglades Experiment Station.

Speakers at the Church of Jesus Christ of Latter Day Saints Sunday evening, according to announcement of Mrs. H. B. Walker, were Mrs. Ruth

Brown and daughter, Mrs. Dewey Blair of West Palm Beach. Other visitors at the evening service were Della and Sarah Blair of West Palm Beach and Harvey Wiggin of Fort Pierce. Wiggin also visited Sunday School in the morning. Other visitors at the Sunday School were Mrs. Iva Martell of Vero Beach and Mrs. Susie Ulrich of Fort Pierce.

MRS. V. R. BEARDSLEY
HONORED AT SHOWER

Mrs. J. H. Harrell of Bean City assisted by Mrs. Raymond Buckles and Mrs. Jack Carnes entertained at a shower honoring Mrs. V. R. Beardsley at the Harrell home Thursday evening.

Mrs. R. L. Barrett won first prize at game and Mrs. Dan Beardsley second prize.

Refreshments and decorations carried out the stock motif. The display of gifts was followed by refreshments including cake served with ice cream molded in the form of a stock carrying an infant, cake, nuts, mints, lime sherbet and ginger ale.

Others guests were Mrs. C. A. Armstrong, Mrs. J. W. Beardsley, Mrs. Hovas Prevatt, Mrs. J. Frank Prevatt, Mrs. Julian Wood, Mrs. E. E. Dasher, Mrs. Elzie Prevatt, Miss Hazel Prevatt, Miss Gloria Crosby, Mrs. W. M. Jeffries, Mrs. Dorothy Canen, Mrs. Kenneth L. Warren, Mrs. Carroll Warren.

SOUTH BAY TEACHERS
ATTENDING CONFERENCES

The South Bay teachers have all returned from their vacations and are attending general conferences in West Palm Beach this week. The faculty is complete except for one teacher, Fred Ray Blocker, who had been assigned to the corps of teachers here, a veteran, was forced to return to the hospital for treatment and resigned his position here.

The first grade will be registered on Monday, August 31 at the school under direction of Mrs. Edythe Eckman.

School for all classes will open on September 8, the teachers meanwhile will be busy during next week at the school preparing for the opening of school. Principal and Mrs. Pellon Morris, her mother, Mrs. Henry Tripp and their children have returned from a visit to their old home in Philadelphia, Miss. Mrs. Eckman visited in Charleston and Uniontown, Pa., in early summer and last week enjoyed an outing at Naples with Mrs. Ivan Hall and children of Clewiston.

Mrs. Olga Hardy and husband M. J. Hardy spent her vacation on an extended tour of

Europe and the British Isles and a visit among relatives in west Florida.

Mrs. Leslie Martin spent her vacation at her home here and in visiting her daughter and son-in-law, Mr. and Mrs. J. H. Hawkins in Miami, her son and daughter-in-law, Mr. and Mrs. W. F. Martin in Fort Myers.

Mr. and Mrs. Hector Oullette returned Saturday from their session at summer school in Kentucky and are again parked in the Fisher Trailer Park.

PAMELO WILLITS HAS
BIRTHDAY PARTY

Mrs. H. C. Willis of South Bay complimented her little granddaughter, Pamela Willis of Miami on her seventh birthday, Thursday afternoon.

The children were entertained in the lawn. Light refreshments were served to Pamela and her guests, all of whom were cousins, including Doris, Dick and Dan Willis, John, Barbara and Joan Willis, South Bay, Richard and Sammy Van Landingham, Belle Glade, Ann, Terry Priest and their infant sister of Chosen.

Adults were Pam's parents, Mr. and Mrs. W. H. Willis of Miami, Mrs. H. C. Van Landingham, Mrs. Herbert Priest of Chosen, Mrs. F. B. Willis and Mrs. E. M. Willis.

MARRIAGE ANNOUNCED

Mrs. Allie Manga and J. B. Rhodes announce their marriage Saturday, August 2 in Folkston, Ga. They are making their home in South Bay, where he operates the Superlative Service Station.

NEWS OF GLADES BOYS

(Continued from Page 1)
Blokes walking abreast down the sidewalk never thinks of dropping behind so that you aren't forced off in the street to pass them. The English as a rule are rather reserved which makes it a slow process to form close acquaintances. The English are much more nationalistic than we are. For instance in an international sports meet with contestants from many countries competing, an American sportsman covering the event would spend most of his time describing the winners and the 2nd and 3rd place men in the events no matter what country they came from, the English sportsman on the other hand would spend his time almost exclusively on the English contestants either praising their wins or allying their losses. A very good example of this was the English vs. American coverage of the Le Mans Road Race last year and this year. In almost every city and village can be seen buildings, streets, bridges, etc. that would make St. Augustines proudest relics seen young and married.

by comparison. The proprietor of the inn in the little village just down the hill from our Base here nonchalantly informed me that the village pump in the center of the inn was over 400 years old and it was still in operation. The thatched straw roof of the inn was replaced over 40 years ago. Some thatched roofs are said to give good weather protection up to 70 years. The old stone inn building predates the village pump, but the prop. wasn't sure how much.

All public lands, including village greens, traditionally belong to the Queen (or king as the case may be) and it is considered a dire breach of custom to walk on the Queen's grass. All trees on private land or what have you belong to the Queen (govt. actually). If you have a tree on your land and you decide to cut down, you don't just whet up the old axe and dash out and start chopping. First you go through a lot of red tape to get the Queen's permission. Finally a date is set for the big event. You cut the tree down and govt. (truck) hauls away the trunk to be used as the govt. sees fit. You are generously allowed to keep the small branches. I'm told that this custom or law stems from the old wooden ship days; even then timber was scarce in England.

I learned right soon the words, "bloody" and "bugger," aren't used by those who know in polite society. I have yet to get a satisfactory definition for either of the words, but I gather that they compare right favorably with our more choice curse words.

Although the English speak the same language as we do one sometimes wonders. A drug store is a "chem shop," and you don't get ice cream, etc. there; those can be had at the local "milk bar". One doesn't go to the hardware store for a pound of nails, you go to the "iron grocers" for your fresh vegetables and fruits; the "provisioner" for canned, oops! "tinned" foods; the "butcher shop" for your meat and to the "dairy" for your milk, etc. All trucks are "lorries"; a dump truck is a "hopping lorry". A station wagon is a "shooting barn". Going into the parts of an auto you really have fun. The hood is the "bonnet", the windshield is the "windscreen", the carburetor is the "mixer", the choke is the "strangler", the transmission is the "gear box", and of course the whole business operates on "petrol" rather than gasoline. You don't ask for a round trip ticket, you ask for a "return fare". You don't go to the local theatre to see a movie, the local theatre presents stage productions, you see your movies at the local "cinema". You don't line up for something,

you "queue" (Pronounced same as letter "Q") up. Speaking of the "cinemas", there are four to six different prices for seats depending where you desire to sit; balcony, garden me, I mean "circle" seats are the most expensive. One good old English custom the cinema is you can light up your "dag" (cigarette) anywhere you please. At the end of an evening's performance a picture of the Queen is flashed on the screen and every one stands while "God Save The Queen" is played (same tune as America). I expect one of these days I'll get the back of my head bashed in when some bloke overhears me unconsciously mumbling the words of America. During the course of a cinema program there are two to three five to ten minute breaks during which girls come round selling ice cream, candy, nuts, etc.

My wife and I live in Oxford (the famous university city) in a fairly comfortable little brick cottage (wood is to scarce to use for much building) which costs us just about what a similar place would cost us in Belle Glade, Mr. Edward Boyd (American Magazine) and Senator Paul Douglas to the contrary. Did you by chance read the aforementioned Mr. Boyd's little journalistic gem in the American Magazine entitled, "Europe's New Royalty, the American G. I.?" Maybe he knew what was talking about as far as Italy goes, but I personally know that as far as Germany, France and England go, he is by the least grossly uninformed! I'd like to paraphrase his much used saying in that article, "never before have so many had it so good," it should read, "never before has one known so little about so much!"

Though refrigeration is used by a few of the radically modern "butcher shops" it is generally frowned on, "it hardens the meat!" Soft drinks or sodas are known as "squashes," they are never kept on ice; imagine the lift you'd get from a lukewarm orange "squash" on a hot summer day. It's amazing to say the least!

The English stick strictly to the English language as far as pronunciation goes: "Fillet" for instance is "fill-it" rather than "fil-lay".

One practice over here that I thoroughly approve of is breakfast in bed in all the better hotels.

We must call it quits for now. Thanks again for the Herald.

Sincerely yours,
Ray M. Hardy.

The "Rambling Music Box" could well be the name supplied a Marine Tank of the First Tank Battalion, First Marine Division in Korea.

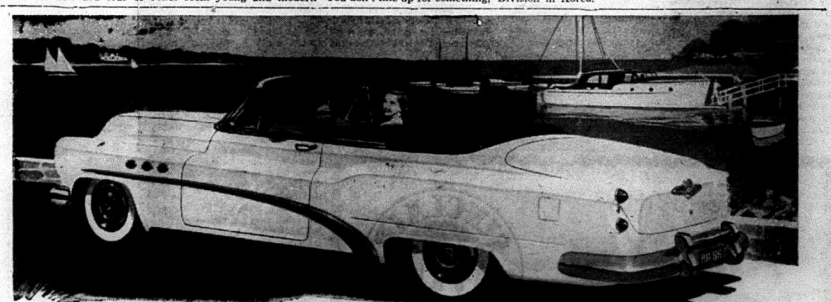

Two of the tanks crews, Pvt. First Class James E. Elrod, son of Mr. and Mrs. J. E. Elrod, born 1932, Clewiston and Dennis Burkdale of Washington, D. C., provide the music on a battle scarred ukulele.

Although it is doubted whether the two would be admitted into the musician's union playing the uke, their music won acclaim from an international audience. Whenever the Marines play, an audience composed of Tuck, South Korean and English United Nations troops jam into a front line bunker to hear the selections of popular big-band-woogie no mountain music.

Private Elrod who enlisted in the Marine Corps in January 1952 lived in Belle Glade as a small boy, later moving to Clewiston, where he attended High School before enlisting. He arrived in Korea Sept. 2, 1952.

Army Pvt. Ruben E. Burch of South Bay, Fla., has been graduated from the Engineer Leaders' Course at the Army's Engineer School at Fort Belvoir, Va. Burch, whose wife, Katie, and mother, Mrs. John B. Kelsely, live in South Bay, entered the Army last October. A former student at Everglades High School, he was a farmer in civilian life.

Although most of the black bass spawning occurs during the spring months, bass have been known to spawn during almost every month of the year.

You can reach a Star

Is it a matter of dollars that keeps you from stepping up to something better?

Come, discover a new peak of motoring pleasure at a price that never leaves the ground.

Yes, this big-power-packed Buick SPECIAL Convertible is yours to enjoy for scarcely more than the Convertibles of "the low-priced three."

And what a joyous carload of thrills that little extra provides.

Here you get a Fireball 8 Engine with the highest horsepower and

compression ratio a Buick SPECIAL ever commanded.

Here you get the big car lift and luxury of Buick's Million Dollar Ride—gentled to lullaby softness by coil springing on all four wheels.

And here are all the other unique and wonderful things that make a Buick SPECIAL such a special Buick. The casual comfort. The suave styling. The neat and knowing craftsmanship that marks every inch of the structure.

Here, too, if you want them, are Twin-Turbine Dynaflow to give you new, smooth and silent get-

aways—and Power Steering* to guide your going with finger-tip ease.

So why not try it yourself, this dazzling beauty that gives so much and asks so little. Check it for price, test it for performance, compare it for value. How about dropping in this week?

Cows Feed Selves In This Hay Barn

Many hours of valuable farm labor are saved when cows feed themselves from a building where hay is dried and stored.

Dairy operations in which cows feed themselves hay from a building where it has been stored and then cared off a means of saving many valuable hours of farm labor, says E. B. Cleland, University of Minnesota Extension Service farm management specialist.

Cleland, writing in the *Queens Farmstead* New June issue, reports that such a system is operating successfully at the State Reformatory farm at St. Cloud and that a similar arrangement has just been built on the Washington County farm of Joseph Karpel and Son.

The hay feeding, storage and curing building is one unit of a loose-housing system that uses two other buildings, one for bedding area and another for the milking parlor and milking room.

"The hay building is 45' wide, 100' long," Cleland says. "It has a concrete floor and two ends. A fan and motor housed on the side of the building forces air through drying tunnels which rest on the floor with hay on top of them."

"The hay is cut at its top quality period, partially dried in the sun, chopped and baled by a self-finger harvester and now-cured by unheated air after it's put in the building."

Movable racks through which the cattle feed are placed at each end of the barn.

Cleland writes that the cows do the rest. "They eat and push, and as they push toward more hay the racks slide along the floor toward the center of the barn. The cows eat their way through the hay, providing more and more shelter for themselves as winter wears on."

Outdoor Florida

By Herb Mosher

Thousands of Florida people subscribe to the *Packer*, the world's largest "trade" newspaper, which circulates also throughout North America and in foreign countries. No Florida citrus or vegetable man I think is ever without the *Packer*, for it is considered to be essential in business. Today I am fortunate enough to have a "guest column" from the editor of this great newspaper — Dick Whiting. It was finally secured from Dick after repeated urgings from me and I know readers will find that Editor Whiting's writings add spice and variety to this column. The *Packer* is published in Kansas City. Its editor is a true sportsman, an outdoorsman, a gentleman and a scholar. This is what he has to say:

When Herb Mosher asked me to write a "column" for his *NEW, Low Cost BUTLER All-Purpose STEEL UTILITY BUILDING* for Garage.

Cattle Shelter... Farm Implement Shed... Low-cost, permanent, fire-safe, quickly erected for long life, all-purpose service.

Widened 20', 24', 28', 32', 36', 40', 44', 48' and wider; lengths available.

casually wet a line trolling for the great King salmon in the Sound, and I have taken a trout or two in the lovely, rushing, icy-cold mountain streams of my home country. But all that was a long time ago.

However, I am going to do an outdoor column for my friend George Kasson of Kansas City (he is a fisherman, and Florida waters know him as those of Canada and points north, east, south and west) just completed with his brother-in-law, William D. Smith of Foley, Fla., also a real fisherman, according to George. (My personal thanks go to Bill Smith whom I have never met for being in this story and giving me the opportunity to get in some local (Florida) touch.)

George and Bill did this particular float trip on one of Arkansas' famed "float-trip" rivers, the Buffalo, which flows into the White, the latter also being widely-noted as a "float" water. What impressed me about the trip, and which made me want to do one like it, was the fact that the two of them went it alone, no others in the party, not even a single guide. The usual party consists of about float boats, six fishermen, three guides, plus a commissary boat equipped with guides which precedes the fishing party to set up the night camps, prepare meals, etc.

George and Bill were the entire party on this trip. They had the usual "long-john" boat, a flat-bottom scow-type affair about 20 feet long. Stocked with the necessary provisions to augment their staple diet—fish—they launched at Yellville, Ark., on the Buffalo, floated five days, setting up camp each night, and in the five days covered approximately 75 miles of river, fishing as they floated (all casting, by the way) and also beaching the boat and working the rapids and fast water whenever they hit likely spots.

"The end result was a really 'big' catch, mostly small-mouth bass, but also some large-mouth bass, plus a sprinkling of trout near the end of the trip when they were in the waters of the White river, which latter, incidentally, is stocked with trout for the first time, the cold water coming from under Bull Dam, supporting trout to the delight of the anglers in these parts.

"Our two 'floaters' used casting equipment throughout, of course. (I'm not just sure why the 'of course,' but that's the way George said it.) For bait, all plugs, 'of course,' they used quarter-ounce spinning rod plugs, spinning-rod size Lazy licks, and a small, shallow-running white bait plug, of course, made by the owner of the boat they were using. Their take was largely half-pound to two-pound small-mouth bass and large-mouth up to three pounds.

"The five-day float ended at Norfolk, Ark., near the junction of the Buffalo and the White. Five wonderful days and nights and about 75 miles of river from their start. And, what particularly impressed this 'stay-at-home' (up to now, but I'm weakening) fisherman was that in those five days of floating they not only had human beings, not a single habitation. That's getting away from it the easy and pleasant way, and I'd like to try it some time. In fact, I think I would like to have Bill Smith of Foley, Fla., bring my friends Crunch and Des up from Florida with him some time and we'll get George Kasson and we'll all do a Buffalo float trip together. I'd get the paddle. I'd wind on the trip (cuddles only, no outboards) that Crunch and Wes would like it. How about it, you guys?"

Shooting glasses will help many hunters. One of these days I expect to have a guest column by a friend who is an expert on this subject. It is like to say, meanwhile, that more than half of all hunters who take to the woods and fields each autumn are handicapped by poor vision. Many a hunter, in fact, has "stopped lead" because a fellow sportsman mistook him for a deer or bear (because of poor eyesight) and let him have it. Here's another angle: often quail or duck shooters who keep missing birds are doing so simply because they are shooting right-handed when their master eye is their left eye! Or vice versa. Actually, this is one of the most common of all the causes of poor marksmanship. So if those deer have kept on running, those birds on flying, as you've ranged away at them in recent hunting seasons—Why not check your eyesight? You may need proper shooting glasses. The right equipment may result in far more game bagged, in more satisfaction, or even in the saving of a life, viz. the life of another hunter whom you would otherwise shoot!

Fishing Licenses for Florida's fresh waters cost too much, I

am convinced. The resident license costs \$2 which is not so bad, though a dollar would be two in the lovely, rushing, icy-cold mountain streams of my home country, had to have one. The non-resident, annual permit at \$10.50 is a punch in the nose for interior Florida, due to the fact that this high cost of fresh water fishing (for tourists) chases the non-resident anglers over to salt water. I note that around \$3 to \$5 is a very common charge for a non-resident license in many states and Canadian provinces. So when a Florida angler visits one of these and wants to buy a fishing license, he quickly discovers that the cost is "reciprocal," viz. the Florida is charged in Quebec what the Quebec fisherman has to pay for a non-resident license in Florida. Turn about is fair play maybe, but a traveling Florida fisherman in one summer can spend close to \$100 on fishing licenses if he covers just a little territory. And many Florida citizens do just that, come summer, some of them go to Alaska even. Now the non-resident 14-day license at \$3.25 in Florida is neither fish nor fowl. I'd say charge our visitors \$1 for a week's fishing; then, if they like it, they should be able to buy an annual permit for not to exceed \$5. The present charges seem to hit squarely into what is known as the law of diminishing return, too, plus the fact that these high charges built up bad will. Besides, as has been stated, working a hardship on persons connected with the tourist business (and that takes in just about everybody) in interior Florida.

Heddon has come out with a strange-looking new lure for the small to medium-sized game fish which is called "Fidget Flasher." The instructions, which come with this bait are, "Brace Yourself!"

Archers can hunt deer this season starting Oct. 10, and through Oct. 28, in the Ocala National Forest. For Elgin Field Reservation, which is probably the best place for deer hunting in Florida, the dates are October 31 through November 8. Since this archery season is now only some two months away all sportsmen who intend to participate should commence practicing with bow-and-arrow now. Even beginners, starting now, with proper instruction, can be in shape to bag a deer.

Arrows are readily at least twice the range of a shotgun. Camping Equipment for this season's hunting season should include some of the new Eddie Bauer "Nestle Down" insulated camp beds. These are so far ahead of the old-fashioned camp-cots that comparison cannot be made. The "Nestle Down" bed folds to 3 x 8 x 38 inches, weighs only ten pounds, and permits sleeping warm and in comfort even on wet ground. The insulation is permanently attached, just under the canvas. Remember how in the old-time

cots or camp beds the cold came up from beneath? These new ones are insurance against that. Do not go camping this autumn without an Eddie Bauer "Nestle Down" insulated camp bed.

First Hunting in Florida this year commences Sept. 12 when the marsh hen season swings open. So truly our hunting season may be said to be at the moment... just around the corner.

Doves continue plentiful. Almost any place you go in Florida you'll see more doves than usual. In fact, I cannot remember seeing so many in the summer time ever before. On a trip which I have been making in recent weeks I found doves plentiful in other states, too. That is, except in South-Georgia where doves are scarce. It does look like early reports of a dove shortage were wrong. If Doves are still a guess. If no

more ducks reach Florida this coming winter than arrived last winter, we might well not even have a duck season. It makes no difference where you check up in the USA, the duck hunters tell you that last season's hunting set a new, all-time low. Let us hope that the supply of waterfowl on the continent is not diminishing as rapidly as appears to be the case. Some more or less official estimates on the North American duck supply will be forthcoming shortly from sources such as Ducks Unlimited.

USE HAND SIGNALS EVEN WHEN AWAY FROM HOME

Use hand signals when you're driving your car on a trip away from your home state. Even though the vehicle is equipped with automatic electric turn signals, advises Robert J. Fin-

ley, manager of the South Florida Division of AAA. A review of the laws of several states by the AAA reveals that in many states, hand signals are still required, even though the electric turn signals are permitted. A motorist, to be certain he's within the law during an interstate trip, would need to whip out a copy of the law for each state the car enters.

The AAA points out that, while automatic signaling devices are permitted in all states, some have not changed their laws to permit the use of such devices. In such states, motorists should give hand signals even though they use automatic signals.

In case of accident, says Finley, "failure to give hand signals is required by law may be regarded as contributory negligence despite the fact that

automatic signals were used." The AAA official says, "the safest course for drivers on a trip away from home is to use hand signals."

The African sausage tree at McKee Jungle Gardens, near Vero Beach, Florida, produces sausage-like seedpods that may weigh as much as 40 pounds each.

BELLE GLADE, FLA.

WASHINGTON
NEWS LETTER

WASHINGTON — It was not generally known, but the United States in the past two years has spent more than \$350 million building merchant ships for foreign shippers while more than

50 percent of the shipyard workers in this country lost their jobs. My personal investigation disclosed this strange fact while we studied in some detail, the conduct of this nation's foreign aid program about which there have arisen much deep misgivings.

Amendment Succeeded — It was because of these facts, and other things disclosed about this program, that I prepared myself to examine thoroughly the provisions of the Mutual Security Appropriations Bill. We also prepared an amendment specifying that the money allocated to ship construction, 50 percent must be spent in U. S. Shipyards. When offered my amendment having rounded up substantial support for it and in the face of the logic of our position, it was approved without a dissenting vote. (We lost on every amendment offered to cut the foreign aid bill.)

Second Victory — This was our second victory of the week. Earlier several of us joined in a coup for the shippers of fruit and vegetables. The ICC is now in a position which would prohibit trip-leasing—that is, the order specifically would make it necessary for produce truckers moving vegetables and fruit

northward to return empty instead of picking up payloads which, in effect, kept down the cost of the trip north.

Bottled up Legislation to set aside this ICC order had passed the House, but was bottled up in Senate Committee with a prospect of moving to the floor. At a strategic moment there I introduced this trip-leasing amendment to the bill.

Famine Bill sought by the President. The maneuver had the effect of making clear the strong support for this bill. With a number of influential Senators joining in support, the leadership finally agreed to permit the Committee on Agriculture time to meet and formally to request ICC postponement of its order (scheduled to go into effect Sept. 1), until the Senate could act upon the matter. I withdrew my amendment and this action was subsequently taken.

Third Victory — Another fruit fight I made was against a rider in the bill appropriating funds to the ICC which would have abolished the Motor Carriers safety program, with its enforcement officers along the various highways. There is no logic in passing laws and then providing for no enforcement. This provision finally was dropped from the bill.

PANIC—NOT THE A-BOMB
MAY BE ULTIMATE WEAPON

Collier's Magazine for August 21, will feature an article by Val Peterson, Federal Civil Defense Administrator, on Panic as it relates to modern warfare and civil defense, according to a bulletin received by Colonel G. G. Howie, USA (Ret'd), Director of Florida Civil Defense. "Panic — not the A-Bomb may be the ultimate weapon, the easiest way to win a battle, the cheapest way to win a war," the Federal Civil Defense Administrator, is quoted in the article which is entitled "Panic — the Ultimate Weapon."

Continuing, Administrator Peterson says: "War is no longer confined to the battlefield. Every city is a potential battleground, every citizen a target. There are no safe rear areas. Panic on Main Street can be as decisive as panic in the front lines. Just as a single match can burn a forest, so a trivial incident can set off a monstrous disaster when the confusion and uneasiness of the population have reached tinder point."

A prepared and well-informed citizenry, Peterson says, is the best insurance against panic. Ninety percent of all emergency measure after an atomic blast will depend on the prevention of panic among the survivors in the first few minutes.

To deal with panic, Peterson explains in the magazine article, that his agency is:

- 1—Providing the public with a continuing flow of information on the danger we face.
- 2—Developing a vast pool of civil defense leadership which reaches down to the family level.
- 3—Preparing broad emergency information facilities ready to give the people a swift, full account of what happens before and during an attack to calm their fears.

To stop panics and safeguard citizens in a crisis, Peterson offers this advice:

- 1—Face the facts. The more you learn the safer you are. Insulate yourself against panic by finding out all you can about the enemy's weapons—A-bombs, germ and gas warfare, sabotage and rumor war. Misinformation and lack of information breed panic.

Get ready at once. Preparedness is good preventive medicine against panic. Prepare and train your family so that the members can perform their duties like trained soldiers under fire.

Here's how:

- 1—Talk to your family about the dangers you face. Work out practice drills so you all know what to do at home, at work or at school.
- 2—Get a civil defense emergency first-aid kit together and learn how to use it.
- 3—Put away a three day emergency supply of food and water — enough to take care of the whole family and its special needs.
- 4—Build a home shelter if you live near a target area. If you cannot build one, pick out the safest shelter in your home. Personal shelter can save your life.
- 5—Be sure you have workable AM radio, preferably battery-operated, in your shelter area. Remember the Conelrad frequencies 640 and 1240 where in an emergency you can get official news and civil defense instructions.
- 6—Take a Red Cross First Aid course as soon as possible. Study the Civil Defense booklet "Emergency Action to Save Lives." You can get it at your local Civil Defense office or at the Government Printing Office, Washington 25, D. C., for

Too Late To Classify

By Russell Kay
Florida citrus growers may have their troubles but according to an article in the Christian Science Monitor, written by George Langley and dated Redlands, Cal., growers in Southern California have been taking it on the chin so long that they are tearing up their bearing groves and replanting with two and three seedling homes that will readily to the horde of incoming home-seekers who arrive at the rate of about 47,000 a month to make their home in the land of golden opportunity.

According to Langley, California growers have had to dig into their pockets in order to stay in business for the last two years and many of them have found that a new "subdivision" is the answer.

A survey by Sunlight Growers, Inc., reveals that approximately 25,000 acres of groves have been junked to make way for a more promising and profitable venture in the real estate business. Cash on the barrel head looks better to California growers than years of palfry profits or possible red ink in the orange growing business.

The weather has never been as kind to California growers as it has to the men in Florida. Sprinkle pots and firing is the order of the day out there, and while an occasional freeze may hurt the most powerful engine in the orange growing business, the hazard is nowhere near as great as in this state.

Operation costs have steadily risen in the West, much more so than in Florida. Oil heaters is costly, and on top of this some Southern California

communities have passed ordinances that make it unlawful to burn anything that creates a smudge or smoke, such as old tires, in fighting frost.

Industrial development in the West has been extensive and it has forced the California grower to compete with high wage industry for labor, a situation that has so far proven no problem to Florida operators.

Another problem created by this rapid industrial growth in the West is the damage to crops and fruit from factory fumes that lay a deadly smog over large areas. According to a report of the Citrus Experiment Station at Riverside, Cal., air pollution caused \$500,000 worth of damage to Los Angeles County crops alone in 1952.

This situation does not necessarily mean that California is going to be wiped off the map as a citrus competitor — at least not for a long time — but it does indicate a trend in the years ahead California's volume will probably be reduced as growers there quit the business and turn to something more promising.

In Florida, too, we find old groves being torn up to make way for subdivisions to a limited extent, and during the past few years we have been planting new groves that probably more than offset those destroyed.

In metropolitan areas like Tampa, St. Petersburg, Miami, Orlando and a few other localities, we can expect to see our citrus operations make way for home-seekers and new industry for home-seekers are arriving in Florida in increasing numbers and our cities in citrus areas are expanding just as they are in Southern California.

So far smog and fumes have not hindered our fruit and vegetable growers to any extent. Some damage has been complained of by growers in the Ruskin area but it will probably be years before industry reaches a point in this state where any serious trouble of this nature will develop.

Citrus is big business in Florida and will remain so for years to come. With the benefits of Florida Citrus Commission and Florida Citrus Mutual we should be able to keep the industry operating on a profitable basis.

Florida Citrus Commission and Florida Citrus Mutual we should be able to keep the industry operating on a profitable basis. The future looks bright for citrus in Florida, and with sound leadership and constructive planning the industry will thrive and prosper.

SHORT-TERM POLIO
CONTROL NOT A VACCINE

Field trials involving 54,772 children and supported by the National Foundation for Infantile Paralysis have proved that gamma globulin, a fraction of adult human blood, provides limited protection against the paralytic effects of polio. Research scientists have shown that this temporary and passive

immunity is due to the presence of polio antibodies in gamma globulin.

Gammaglobulin is not a vaccine. In contrast, a vaccine should provide longer-lasting protection against the disease.

An injection of gamma globulin provides an individual only with temporary protection against the paralytic effects of polio. This protection is created by the antibodies in blood contributed by someone else. This is passive and fleeting immunity. A vaccine, on the other hand, would induce the body to produce its own antibodies. This research scientists define as an "active immunity."

While the protective quality of gamma globulin is of short duration — about five weeks — a protective vaccine would be expected to endure for a much longer time.

Research scientists estimate that about 80 percent of the population of the United States, above the age of 18, has acquired active immunity against one or more types of polio by having contracted mild, frequently imperceptible cases of the disease early in life. This immunity of adults, even though they may not know that they ever were infected by polio, possesses protective antibodies. It also is known that during their first

six months of life babies possess the same number of polio antibodies their mothers have. This inherited immunity disappears during the child's first year.

Infection by one type of polio virus does not induce immunity to either of the other two. This has been demonstrated by the fact that there are on record a number of cases in which patients have contracted polio twice. Theoretically it is possible for patients to suffer the disease three times, but no such cases have been recorded.

Thus, research scientists are convinced that gamma globulin is not a practical or final answer to the problem of poliomyelitis. At least, it is regarded as a temporary stopgap during the epidemic season. This summer the limited amount of gamma globulin will be distributed free of charge to state health officers by the Office of Defense Mobilization, a federal agency. All allocations of the blood fraction will be made by this agency of the government.

Overall construction surged ahead in even greater volume than last year's record rate, despite predictions that the pinch on mortgage money could well bring a drop in housing production reports Architectural Forum.

New CASE
Field Forage Harvester

Here's a sturdy machine which provides a real short-cut in the making of corn or sorghum silage. In one power operation, the Case field forage harvester cuts the standing row crop, chops it into short, uniform lengths, and loads the chopped material into truck or wagon driven alongside or trailed behind. Also may be equipped with pick-up attachment for windrowed hay crops, green or dry. See us about it.
